

NEW JOURNAL FOR 2008

CALL FOR PAPERS

Tackling the highly practical and commercial challenges of network security R&D, *Security and Communication Networks* is an international journal publishing original research and review papers on security and cryptographic mechanisms applied to all types of information and communication networks, including wired, wireless and optical transmission platforms.

The journal provides a prestigious forum for the R&D community in academia and industry working at the inter-disciplinary nexus of next generation communications technologies with physical and upper layer network security implementations.

Submissions of applications-oriented papers describing case studies and simulations are encouraged as well as research analysis-type papers. Invited review papers on topics selected by the Editorial Advisory Board, as well as special issues, will be a regular key feature of the journal.

Reasons to submit your paper to *Security and Communication Networks*

- Complimentary access to your article offered to **ALL institutions worldwide!**
- Prompt publication of your article through the EarlyView service
- Check the status of your manuscript at any time online
- View and respond to reviewers' comments and submit revisions instantly
- PDF proofs of accepted papers are sent by e-mail for faster processing
- 25 FREE off -prints for corresponding authors

Complimentary online access for institutions

REGISTER TODAY!

To the librarian:

Institutions can opt to receive complimentary online access to *Security and Communication Networks*.

Institutions may also request one complimentary print subscription when registering for complimentary online access for *Security and Communication Networks*.

This is NOT a free trial. You will continue to have online access to all content published in 2008 in this journal during 2008 and thereafter. Future pricing for the journal will be based on the overall demand and on the size and type of subscribing institution (academic, government or corporate). There is no obligation to subscribe in subsequent years if you opt for complimentary access.

Online Access to *Security and Communication Networks*

Security and Communication Networks will be available online via Wiley InterScience, the dynamic online content service from John Wiley & Sons.

Stay ahead - The free EarlyView® service allows you to read articles as soon as they are available, before the release of the compiled print issue. EarlyView® articles are complete, peer-reviewed and fully citable.

Keep up to date - Sign up for Table of Contents Alerts to receive the table of contents of the latest issue of your saved journal as soon as it publishes online. Or try Saved Search Alerts, these will automatically email you when an article matching your search criteria publishes online. Design your own alerts based on keywords, author names, subjects, and other parameters.

Expand your resources - CrossRef® linking extends your research pathways by providing seamless links from a reference in a journal article to the cited journal articles, which may be located on a different server and published by a different publisher. Intelligent linking allows you to navigate with ease to and from major indexing and abstracting services.

View citations - Citation tracking allows authors to view published works that have cited the article they are currently reading by selecting citations from journals on Wiley InterScience and other publisher sites.

Export citations - Citations and abstracts from journal articles and OnlineBook chapters published on Wiley InterScience® can now be downloaded as plain text or directly into EndNote.

Save time - RSS Feeds allow you to stay up to date with websites that provide RSS feeds for their content. An RSS reader collects all the information from the RSS feeds to which you subscribe, allowing you to browse all of this content without having to visit each website.

Ask your librarian to register for complimentary online access today!
